

Element Brochure

Your task is to design a six panel brochure about your chosen element. You will collect the following information:

- Element Name
- Element symbol
- Atomic number of the element
- Atomic mass of the element
- Energy level drawing of the atom
- Three common uses of the element
- Three little know/ interesting facts about the element

Also you may include:

- Name of person/persons who discovered the element
- Origin of element's name
- Date of Discovery

After you gather the information make a brochure using the following format. You may use computer software if it is available to you.

Cover

List the element name, symbol, atomic number, and atomic mass number. Also include your name and block.

Panel 2

This panel should be titled "Energy Level Diagram"

You will provide an energy level drawing of the element that is either labeled or color coded.

Panel 3

This panel should be titled "Did you Know?"

The following pieces of information are to be written in complete sentences and should appear as a bulleted list.

Place the interesting facts and common uses of the element in complete sentences. Also you can include the information about the discover, date and origin of the name.

Panel 4

This panel should be titled "Common uses:

The common uses should be written as complete sentences and appear as a numbered list.

Panel 5

This panel should be titled "About the Authors"

Write a short paragraph about yourself. You can also include a picture of yourself here. Include something interesting that you learned by making this brochure.

Back Panel

Leave blank
